

BETH ALTSHULER, MCP/MPH, PUBLIC HEALTH SPECIALIST

Ms. Altshuler's work focuses on community food security, social and health equity, active transportation, and state and local environmental policy. With broad experience working in public agencies, planning and policy consulting, and as an academic researcher, she provides expertise in parks and recreation, transportation, public health, sustainability, and strategic planning. She has extensive experience in designing and implementing innovative community involvement and visioning programs as well as qualitative (focus groups, stakeholder interviews, etc.) and quantitative (statistics and GIS) analysis skills. At the forefront of the healthy communities discipline for almost ten years, Ms. Altshuler is committed to creating livable places, reducing health disparities, and engaging residents in the future of their communities.
